ABOUT US

Ekka biologicals was promulgated in the year 2020 as a private limited company aiming towards medical service and manufacturing sector. Further, working board of directors and consultants of Ekka biologicals are pioneers in Virology, Bacteriology, Biochemistry and IT with profound experience in diagnostics, research and academics. Ekka biologicals and diagnostics strive hard to provide a comprehensive platform for laboratory diagnostic services with cutting edge technologies and least human intervention which are required for modern day accurate disease diagnosis. Our mission is to provide a realistic diagnosis at a decent turnaround time with most modern techniques reachable to the common man.

The diagnostic laboratory is well equipped with most recent IVD certified medical devices and equipment. The staff are well trained and equipped with knowledge and humane concern for the patients and clients. The laboratory is established at one of the best developing and fastest growing areas of Chennai Metropolitan city.

Reliability, ethics, sustainability and humane concerns are our motto especially to the senior citizens and women's health. We strive hard for excellent service and decent turnaround time from sample collection to results. The management of Ekka biologicals and diagnostics are themselves from the field of diagnostics and therefore manage the entire laboratory services with smart work and quality. The efficiency of the laboratory services is checked at regular intervals with third party laboratory auditors which is one of the uniqueness of our facility.

Further we have internationally renowned diagnostic experts as consultants in our management team who update us with the trends in diagnostics and we equip ourselves to be akin to global standards and requirements.

VISION

To establish and maintain a world class reference center for clinical, diagnostic, research and biomedical manufacturing laboratory.

To introduce standard and advanced technologies throughout biomedical fraternity for upliftment of needed and enabling opportunities for research, development, teaching and learning.

Goals and Objectives

- Establish a developed and accredited reference diagnostic laboratory with cutting edge technologies and advancement in instrumentation and quality.
- To introduce rare and advanced testing at nominal cost to the needed.
- Create awareness on importance on proper diagnosis and prompt reporting.

Ekka Quality Policy

EKKA BIOLOGICALS is committed to provide clinical laboratory services of highest quality by adopting Good Clinical Laboratory Practices (GCLP) and using approved test methodologies and deliver timely, reliable and clinically useful test results by trained, motivated and competent staff.

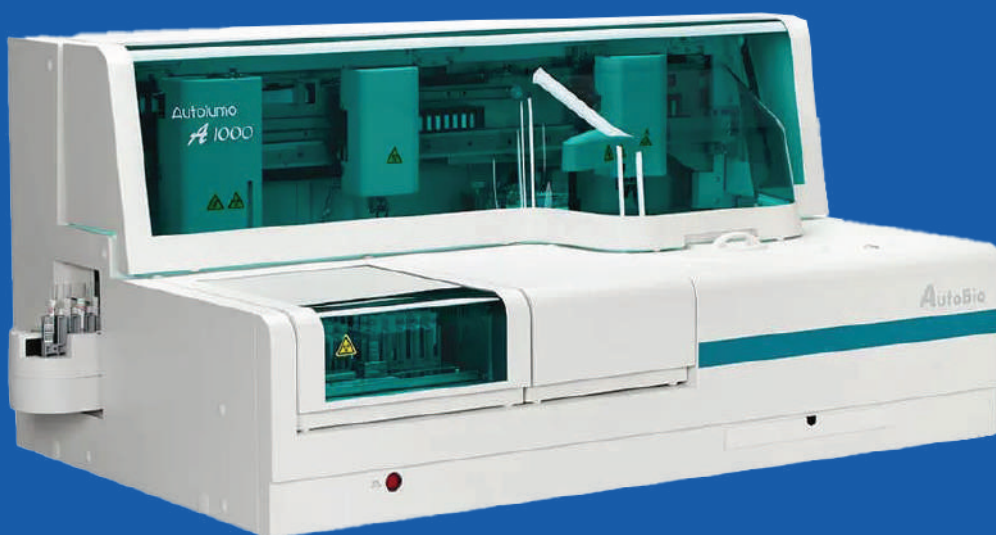

Certification

Our laboratory is NABL accredited and our medical devices are IVD/CE certified.
